Hardy Cacti, Colorado Shrubs and Plants

ILLUSTRATED CATALOGUE.

D. M. ANDREWS,
INTRODUCER OF NATIVE COLORADO PLANTS.
BOULDER, COLORADO, U. S. A.

TO THE READER.

In handing you our new Illustrated Catalogue we would invite especial notice to the fact that the majority of the plants and seeds offered can be obtained no where else in the world. During the past few years we have introduced more really new plants than any other firm. Besides shipping to nearly every part of the United States we have sent plants and seeds to various points in England, Scotland, Ireland, Germany, France, Belgium, Holland, Switzerland, Austria, Servia, Japan, New Zealand and Australia. You need not hesitate to send for goods on account of distance. Not only are we successful in having our plants reach customers in good condition, but from numerous reports we find that almost without exception they continue to grow and flourish.

Directions for Ordering: Prices include postage on seeds to any part of the world, and on single plants to any part of the United States. We advise shipping by express (or by freight for Cacti) except where the quantity is small. Plants go by express at a special rate. Mail packages to Europe are restricted to eight ounces. Remit by any safe method, foreign remittances preferred by International Postal Money Order. We add extras according to the nature and size of the order and believe this to be the best way of distributing premiums.

Thanking you all for your substantial encouragement, we shall take pleasure in supplying your needs for the coming season.

Boulder, Colo., Feb. 1, 1901.

Very truly yours,

D. M. ANDREWS.

HARDY CACTI.

The collection of six or seven sorts which we hesitatingly offered some years ago has increased to more than a dozen distinct sorts and has far exceeded our expectations in every way. They were a decided success from the first, both to seller and purchaser, and our sales have extended to all portions of the United States, to most parts of Europe as well as to points still more remote. Although an outgrowth, biologically, from peculiar conditions of climate and habitat, they have proved to be the most adaptable of plants, and make themselves equally at home on the parched desert or in the humid climate of England. As to hardiness, they have been used with entire success at Minneapolis, Minn., Buffalo, N. Y., several points in Massachusetts, and near the sea coast. Several of the sorts offered are native as far north as South Dakota. This data together with observations as to effects of altitude above sea level, etc., establish the belief that all of these will succeed where Indian corn may be matured, while some may be used even farther north.

Given a sunny position with plenty of drainage so the soil will not remain saturated with moisture, especially during winter, and they will flourish with very little care. Rough rock work either natural or artificial, affords the ideal position: they will soon take possession and being evergreen, their value for permanently covering unsightly places is at once apparent.

The stock we are offering is of good liberal size and with few exceptions will bloom this season. This applies particularly to plants ordered by express or freight; though the plants we are sending by mail are wonderfully good for the price we ask. We prepay postage on single plants at the prices named, but on cactus by the dozen extra postage should be included if wanted by mail. It is more satisfactory to have them sent by express or freight.

CACTUS MISSOURIENSIS. Star Cactus. Plant dwarf, blooming when very small, covered with elongated tubercles, each tipped with a star of gray spines. Flowers yellow or salmon, followed by scarlet berries. 10 cents each, 75 cents per dozen.

CACTUS VIVIPARUS. Purple Mamillaria. Whole plant covered with purple and white spines. Flowers very large and showy, bright purple, plant extra hardy and a good bloomer. 20 cents each, \$2.00 per dozen.

ECHINOCEREUS VIRIDIFLORUS. Green Flowered Cereus. This is especially beautiful on account of the red, purple and white spines with which the plant is covered. Flowers numerous, quite large and showy, light yellowish-green, very hardy and easily grown, and may be used effectively for edgings for cactus beds, the rockery or elsewhere. Medium size choice plants to bloom this year, 10 cents each, 75 cents per dozen, \$3.00 per 100. Large size, 15 cents, \$1.50 per dozen. Extra large clusters, 25 to 50 cents.

A rare variety with long projecting spines, 15 cents, \$1.50 per dozen.

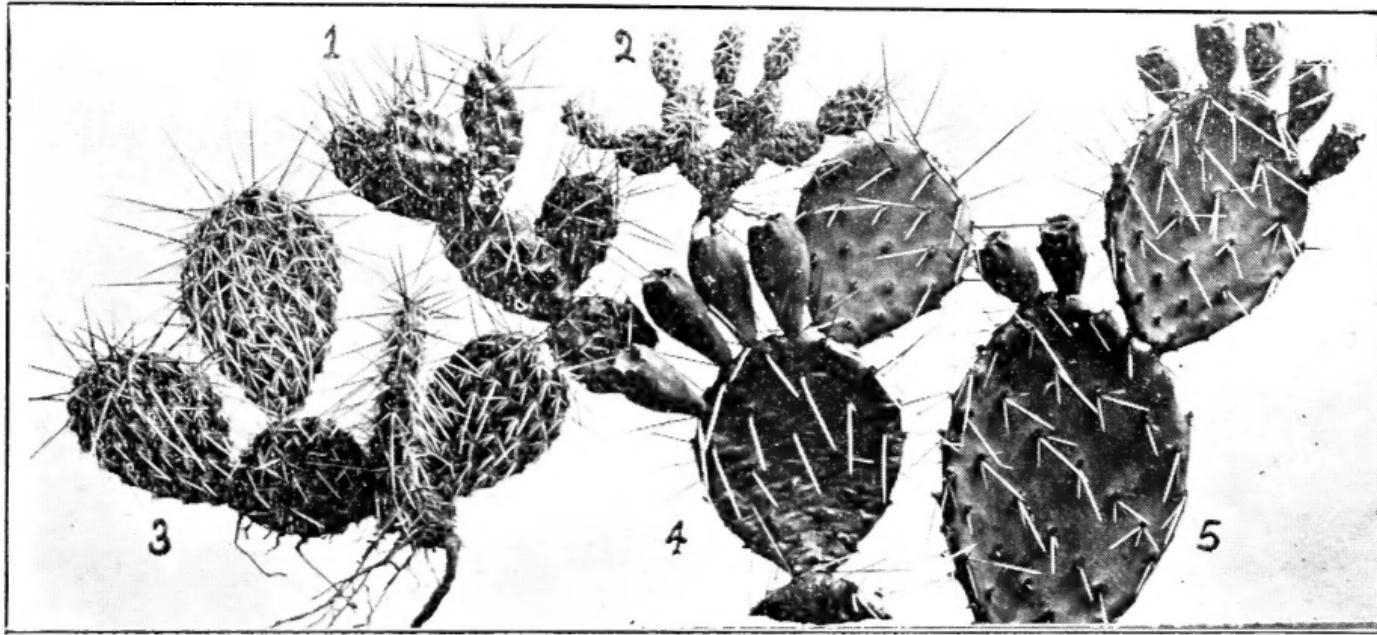

ECHINOCACTUS SIMPSONI. Hedgehog Cactus. Plant nearly hidden by the various colored spines, ranging from white through shades of straw, yellow, brown, etc. Very fine bloomer, flowers from shell-pink to bright rose. One of the few Echinocacti to grow in clusters, an exceedingly beautiful sort, choice blooming plants, 15 cents, \$1.25 per dozen; large, 25 cents, \$2.00 per dozen.

ECHINOCACTUS SIMPSONI MINOR. Button Cactus. Distinct from the last. The spines are arranged in beautiful star-shaped clusters, flowers pale rose, on the center of the button-shaped plant; very beautiful. Price for medium size plants 25 cents, \$2.00 per dozen. Extra large size 50 cents each.

OPUNTIA ARENARIA. (See cut.) This new Opuntia is allied to *O. fragilis* but has flat round joints $1\frac{1}{2}$ inches in diameter; spines very long, white or straw color. Flowers yellow, rather large. Good plants 15 cents, \$1.00 per dozen.

OPUNTIA ARENARIA variety, with brown spines. Forms large symmetrical clumps; very rare and beautiful. Choice plants 25 cents each, \$2.25 per dozen.

OPUNTIA ARBORESCENS. (See cut.) Cylindrical branching sort, often growing 6 feet tall. Large rich purple flowers, yellow fruit and perfectly hardy. Small plants 25 cents. Large. 50 cents, 75 cents and \$1.00 each.

1 OPUNTIA ARENARIA.

2 OPUNTIA FRAGILIS.

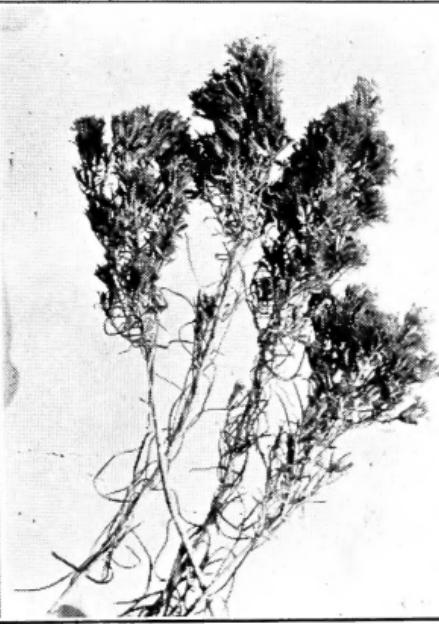

3 OPUNTIA POLYCANTHA

4 OPUNTIA MESACANTHA.

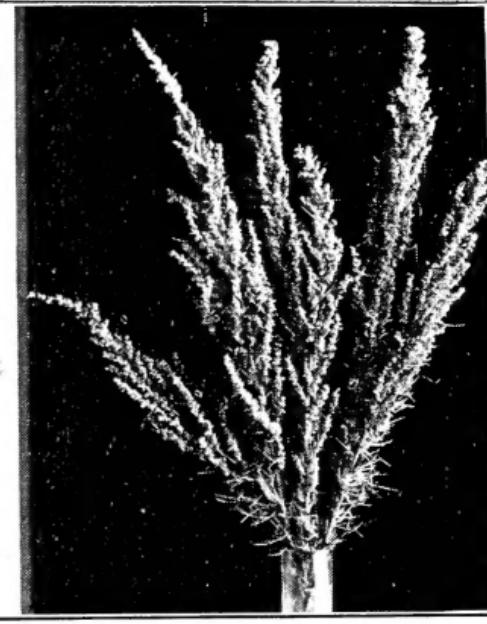

5 OPUNTIA PHAEACANTHA MAJOR.

ABRONIA FRAGRANS.

BIGELOVIA GRAVEOLENS.

ARTEMISIA FILIFOLIA.

OPUNTIA CAMANCHICA. One of the most showy of all, bearing an abundance of large yellow flowers, followed by the large crimson fruit, which ripens early and remains perfect until late winter. The joints are large, nearly orbicular in outline, the upper half is clothed with long stout spreading spines in beautiful shades of white, brown, etc. 20 cents each, \$1.50 per dozen.

OPUNTIA FRAGILIS. (See cut.) This has the smallest joints of any, oval and about one inch long. Very spiny, and soon forms neat compact clumps. Flowers deep yellow. 10 cents each, 75 cents per dozen.

OPUNTIA MESACANTHA GREENII. This has few spines, the joints are obovate and dark green. A most abundant bloomer. Fruit purple. 15 cents, \$1.00 per dozen.

OPUNTIA MESACANTHA CYMOCHILA. (See cut.) A new variety and particularly fine. Joints are rather large, glaucus green, the upper edge bearing numerous, very long and stout reddish brown spines. Flowers exceedingly abundant, fruit purple, very showy. We recommend this fully. Plants 20 cents, \$1.50 per dozen.

OPUNTIA MESACANTHA MACRORHIZA. Tuberous-rooted Opuntia. A very curious, few spined sort with large tuberous roots. Flowers abundant, yellow, fruit purplish brown. 15 cents, \$1.00 per dozen.

OPUNTIA PHAEACANTHA MAJOR. (See cut.) It is, without doubt, the most beautiful of the Hardy Opuntias. The joints are exceedingly large, sometimes twelve inches or more in length. The surface is beautifully glaucous, sometimes decidedly purplish. The spines are abundant, very long and stout and of a fine purple or black color; fruit deep crimson, flowers yellow, shaded orange. The plant grows rapidly and forms large symmetrical clumps. 25 cents each, \$2.00 per dozen.

OPUNTIA POLYCANtha. (See cut.) A handsome species, and remarkably spiny. Spines long, very stout and in lovely shades from white to brown, etc. This plant varies exceedingly and all the forms are exceedingly showy. We have separated the two varieties below and include all other forms herein. This kind should be planted liberally. 15 cents, \$1.00 per dozen.

OPUNTIA POLYCANtha ALBISPINA. White Spined Opuntia. A variety of the last with pure white spines; those on the older joints often elongated and curled or twisted. Very distinct and showy. 20 cents, \$1.50 per dozen.

OPUNTIA POLYCANtha WATSONI. A variety with very dark spines, very long and stout. Joints smaller, flowers orange or tinged purple, very distinct. 25 cents each, \$2.00 per dozen.

COLORADO SHRUBS.

	PLANTS. Each.	Dozen.	Seed Pkt.
ACER GLABRUM. Large shrub of symetrical branching habit, compact, with an abundance of beautiful foliage, small plants.....	15	1 50	
ALNUS INCANUS VIRESSENS. Large. upright growth, 8—12 inches trans....	15	1 50	
AMELANCHIER ALNIFOLIA. Clusters of beautiful snow-white flowers, useful fruit; dwarf sort, adapted to very dry soil.....	10	1 00	
AMORPHA FRAGRANS. Fine European sort. 1½ feet.....	25	2 50	10
AMORPHA NANA. Lead plant. 1 foot. An excellent dwarf shrub with beautiful foliage and numerous clustered spikes of red-garnet fragrant flowers	20	2 00	5
BERBERIS REPENS. (See cut.) Very dwarf, evergreen shrub. Holly-like foliage, masses of fragrant yellow bloom, followed by conspicuous purple fruit. We know of nothing quite so suitable for covering dry or rocky banks and slopes, even under shade of trees. It is not particular as to soil, should be planted out quite thickly and it will soon take entire possession.			
\$1.75 per 100.....	10	50	
CEROCARPUS PARVIFOLIUS. (See cut.) A medium sized shrub, distinct in			

	PLANTS. Each.	Seed Dozen.	Seed Pkt.
in appearance from anything else in cultivation. The peculiar habit of growth is well shown in our cut. Foliage is small, distinct, and remains till late. The long, curled, feathery achenes give a pleasing effect....	20	2 00	10
CORNUS STOLONIFERA, Red Osier.....	10	1 00	
CRATAEGUS, (probably macranthus) Large shrub or small tree, a wonderful abundance of white flowers, followed by showy scarlet fruit.....	15	1 50	
JAMESIA AMERICANA. A small shrub of very distinct habit, fragrant, white, orange-like flowers, ornamental foliage, easily grown.....	25	2 00	10
PHYSOCARPUS TORREYI (Opulaster) small, much branched shrub producing innumerable clusters of Spiraea-like white or rose-tinted flowers.....	20	2 00	
RHUS TRILOBATA. We consider this in every respect the most ornamental of the genus. It does not produce suckers from the root, the leaves are small and three-lobed, taking on beautiful autumn tints. The plant forms compact semi-prostrate masses and thrives in poor, dry soil where few other shrubs will grow. The rather large scarlet berries ripen in summer and remain until winter. We have a fine stock of bushy, well rooted plants.	25	2 00	
RIBES CEREUM. Ornamental, both in bloom and in fruit.....	10	1 00	5

	PLANTS. Each.	Dozen.	Seed Pkt.
<i>ROSA ARKANSANA.</i> Very dwarf, one foot or less, free blooming, large scarlet fruit, will grow in very dry soil.....	10	50	5
<i>ROSA FENDLERI.</i> Larger, very showy flowers and fruit.....	10	75	5
<i>RUBUS DELICIOSUS.</i> Very distinct shrub, compact growth, large, deeply lobed leaves, snow-white flowers two inches across, profuse bloomer, exceedingly hardy, very handsome whether in bloom or not.....	15	1 50	10

SELECT HARDY PERENNIALS.

This list includes the best only of the Native Colorado Plants, and a few especially good sorts from various sources. Of many of these we offer both seeds and plants, while some can be furnished in seeds only; please note this fact. All are perennial unless otherwise stated.

	PLANTS. Each.	Dozen.	Seed Pkt.
<i>ABRONIA FRAGRANS.</i> (See cut.) Wild Four-o'clock. 1 foot. Many large umbels of fragrant white flowers, all summer.....			10
<i>ABRONIA MICRANTHA.</i> Pink Abronia. Annual, flowers pink, followed by very conspicuous broadly winged fruit; wings membranous, shining, reticulate-veined and handsomely colored. Delights in warm sandy soil,			

	PLANTS. Each.	Dozen.	Seed Pkt.
blooms all summer.....			10
ACONITUM AUTUMNALE. 3 feet. Very late, dark blue.....	15	1 25	
ACONITUM COLUMBIANUM. Tall, early, deep blue.....	15	1 25	
ACONITUM FISCHERI. Late, large flowers, bright blue.....	10	1 00	
ANEMONE PATENS NUTT. The American Pasque Flower, producing in early spring the very large cup-shaped lavender or bluish flowers, followed by the laciniate foliage and feathery seed heads. Extra choice, well rooted	10	75	5
APLOPAPPUS FREMONTI. Dwarf plant, smooth foliage and rather large star- like yellow flowers for long period.....			25
AQUILEGIA CHRYSANTHA. Columbine. Beautiful long-spurred yellow flow- ers, remaining long in bloom.....	10	1 00	10
AQUILEGIA COERULA. Colorado State Flower. The most beautiful of all Columbines, very large erect blue and white flowers, rather dwarf, an exceptionally desirable plant. Large blooming size plants.....	10	1 00	10
AQUILEGIA. Long-spurred hybrids. A beautiful strain of large flowering long-spurred hybrids, mostly light tints, white, rose, cream, yellow, scar- let and variations. Fine thrifty plants.....	20	2 00	10

	PLANTS. Each.	PLANTS. Dozen.	Seed Pkt.
AQUILEGA. Short spurred hybrids			10
ARTEMISIA ARBUSCULA. Oblanceolate whitish foliage, shrubby.....	25	2 50	10
ARTEMISIA FILIFOLIA. Thread-like foliage, fine mist-like flower sprays, (see cut).....	20	2 00	10
ARTEMISIA FRIGIDA. Used extensively as an edging plant. With its sil- very moss-like foliage, which is more or less evergreen, it cannot be equaled for this purpose by any other hardy perennial. This is absolute- ly drought-proof and is not particular as to soil. Per 100, \$1.50	10	40	10
ARTEMISIA GNAPHALOIDES. Broad, silvery-white foliage, especially effect- ive when naturalized among shrubbery, etc.....	10	75	10
ARTEMISIA LUDOVICIANA. Similar to the last, but foliage more or less laciniate	10	75	10
ASPIDIUM FELIX-MAS. Male-fern. Large, broad, finely cut fronds of firm texture, heavy stock.....	15	1 00	
ASPLENIUM FELIX-FOEMINA. Lady-fern. A very large fern; should have shade and moisture.....	20	1 50	
ASTER COMMUTATUS. Immense crowded panicles of rather large white flowers, plant dwarf.....	15	1 00	10

	PLANTS. Each.	Seed Dozen.	Seed Pkt.
--	------------------	----------------	--------------

ASTER ERICIFOLIUS. (not ericoides) A very unique new species with moss-like foliage. Plant only 3 to 6 inches tall but blooms so profusely as to carpet the ground with snowy white. Flowers appear in June and continue for some time; very distinct	15	100	
ASTER FENDLERI. Dwarf species, not exceeding one foot, producing an abundance of rather large flowers of a peculiar tint of rosy-lilac, very pleasing.....	15	100	10
ASTER LAEVIS. Tall, large blue flowers, late.....	10	75	5
ASTER PORTERI. Slender sort, usually not more than one foot tall, producing large panicles of medium-sized many rayed flowers of purest white. This is a gem among dwarf Asters.....	10	75	10
ASTRAGALUS PICTUS. Bird's Egg Plant. Foliage linear and upright, having the appearance of slender leafless stems, among which are clusters of beautifully mottled, inflated pods, as large as bird's eggs, and which they strongly resemble.....			10
BIGELOVIA GRAVEOLENS. Golden Feather, or Plumed Golden Rod. (See cut.) One of our best introductions, and becoming immensely popular			

	PLANTS.	Seed	
	Each.	Dozen.	Pkt.

with our customers. The golden plume-like panicles and neat appearance together with the fact that it thrives under the most ordinary care will stand as reasons why you cannot afford to be without it. Choice two-year-old plants.....	15	1 50	10
<i>BIGELOVIA ALBICAULIS</i> . Equally desirable, but entirely distinct. Both are somewhat shrubby, but while the last often reaches 3—5 feet, this seldom exceeds 6—9 inches, and with smaller panicles. Useful for edgings....	15	1 50	10
<i>CALOCHORTUS GUNNISONI</i> , Mariposa Lily. Entirely hardy, very large white or lilac-tinged flowers, with large blotch of color at base of petals. One to two feet, July, excellent for cutting. First size blooming bulbs, ready in September, per 100, \$2.00.....	30		
<i>CACALIA TUBEROSA</i> . Indian Plantain. A robust plant three feet tall, producing one to several ample cyme-like panicles of tassel-shaped white flowers. The panicles are often two feet broad and remain in bloom a long time.....	25		15
<i>CERASTIUM ALPINUM</i> , Carpet of Snow, useful.....	15	1 00	10
<i>CHEILANTHES FENDLERI</i> . Gold fern. Rocky soil.....	15	1 00	

	PLANTS. Each.	Dozen.	Seed Pkt.
CLAYTONIA LANCEOLATA. Western Spring Beauty.....	10	75	
CLEMATIS DOUGLASII. (See cut.) This belongs to the Leather Flower group, and has the largest bloom of its class. It is not a climber, but an erect, bushy, hardy perennial plant about one foot tall. Flowers in varied shades of blue, purple, etc., exceedingly beautiful, followed by a showy, curled crest of plumed achness. No clematis is easier grown than this. Fine, well rooted clumps.....	15	1 00	
CLEMATIS FREMONTII. Similar in size and habit, but very distinct in foliage and appearance.....	20	2 00	
DELPHINIUM BICOLOR. A very early dwarf sort, blooming in April, only one foot tall, flowers deep blue and freely produced.....	10	75	10
DELPHINIUM AZUREUM ALBIDUM. Tall spikes of white flowers.....	10	75	10
DELPHINIUM SCOPULORUM. Beautiful, rich Gentian-blue flowers, in long spikes, elegant plant, early.....	15	1 00	10
DODECATHEON PAUCIFLORUM. (See cut) A very beautiful, rather slender sort with delicate rose-purple flowers. Will thrive in the shady corner, and is especially desirable for the edge of perennial border or rockery; \$2.00 per 100	10	50	10

	PLANTS. Each.	Dozen.	Seed Pkt.
ERYNGIUM YUCCAEFOLIUM. A distinct sort, with long yucca-like, glaucus foliage, very neat	10	75	5
GAILLARDIA ARISTATA. A beautiful sort with large yellow flowers.....			5
GAILLARDIA "CRIMSON BALL." A remarkable and exceedingly handsome rayless variety. The large globular crimson heads are freely produced, and are very showy and distinct from anything else in cultivation.. ...		25	
GAILLARDIA GRANDIFLORA. Very large flowers, mixed colors.....			5
GAILLARDIA GRANDIFLORA COMPACTA. A dwarf compact sort, free blooming, and in a gorgeous variety of colors.....			10
GAILLARDIA PINNATIFIDA. A new and distinct, miniature, free blooming species, perennial and hardy and a valuable plant.....			25
GENTIANA BIGELOVII. Clustered, dwarf habit, numerous blue flowers in autumn, ordinary soil.....	10	75	10
GERANIUM FREMONTII. Large light purple, free bloomer.....	10	75	10
GERANIUM RICHARDSONII. Flowers white veined purple.....	10	100	
GUTIERREZIA EUTHAMIAE. Dense hemispherical clumps, covered in autumn with myriads of small golden yellow composite flowers.....	10	75	5

	PLANTS. Each.	Dozen.	Seed Pkt.
HELIANTHUS LAETIFLORUS. Large yellow semi-double flowers.....	10	50	
HELIANTHUS MAXIMILIANI. Very tall, robust sort.....	10	75	5
HELIANTHUS RIGIDUS. Rather slender, large yellow flowers.....	10	40	5
HELIANTHELLA QUINQUENERVIS. Star Sunflower. Very large light yellow flowers, very early, 3 feet.....	15	1 50	10
HEUCHERA SANGUINEA. Crimson Bells. 1½ feet. One of the most beauti- ful of hardy plants, producing its numerous sprays of crimson-scarlet flowers for many weeks. No discription can do justice to this remark- able plant.....	10	75	5
HEUCHERA SANGUINEA ALBA. 1 foot. Those who have seen the sanguinea will welcome this pure white form which comes perfectly true from seed.	15	1 00	10
HEUCHERA SANGUINES HYBRIDA. Handsome and interesting robust forms, various colors.....			15
HEUCHERA ROSEA. Elegant rose flowered variety.....			15
HYDROPHYLLUM OCCIDENTALE. Very handsome large fern-leaved sort, showy flowers, for moist or dry shade.....	10	75	
IRIS MISSOURIENSIS. A kind especially suited to dry soil, rather slender, with large blue flowers.....	10	60	5

DODECATHEON PAUCIFLORUM.

OPUNTIA ARBORESCENS.

CEROCARPUS PARVIFOLIUS.

YUCCA ANGUSTIFOLIA.

BERBERIS REPENS.

CLEMATIS DOUGLASII.

	PLANTS. Each.	Dozen.	Seed Pkt.
--	------------------	--------	--------------

<i>LEPACHYS PULCHERRIMA HYBRIDA.</i> An improved strain having very large flowers and broad rays, the colors ranging from orange through yellowish brown to deep maroon; some flowers self-colored while others are beautifully striped and mottled. Hardy perennial but blooms first year from seed, continuing to bloom from early summer till frost.....		25	
<i>LEUCOCRINUM MONTANUM.</i> An exquisite liliaceous plant producing a long succession of large, fragrant crystal-white flowers at the surface of the ground; early spring.....	10	60	
<i>LIATRIS PUNCTATA.</i> A very showy dwarf sort.....	10	60	5
<i>LILIUM MONTANUM.</i> Erect scarlet flowers, rare	35	3 00	
<i>MALVASTRUM COCCINEUM.</i> Very dwarf, numerous bright scarlet flowers, ornamental lobed foliage, will grow in poor, dry soil, blooms all summer,	10	50	
<i>ŒNOOTHERA ALBICAULIS.</i> Tall, large white flowers, all summer.....	10	75	10
<i>ŒNOOTHERA BRACHYCARPA.</i> Rosette of narrow foliage, very large yellow flowers, clay-loam soil.....	10	75	10
<i>ŒNOOTHERA CAESPITOSA.</i> Similar, but flowers white, changing to rose, sandy soil.	10	75	

	PLANTS. Each.	Dozen.	Seed Pkt.
ŒNOTHERA FRASERI. One foot, branching, yellow.....	15	1 00	
ŒNOTHERA SERRULATA. 6—10 inches, much branched, numerous crumpled yellow flowers an inch broad, blooms all summer, sandy soil, distinct sort.....	10	75	10
PHLOX DOUGLASII. Dwarf, large flowered, floriferous.....	10	75	10
PHYSARIA DIDYMOCARPA. Handsome evergreen rosettes resembling a Sempervivum, multitudes of bright yellow flowers many weeks, followed by curious inflated pods.....	10	75	
PHYSOSTEGIA VIRGINICA ALBA. We have a fine stock of this comparatively new plant. White flowers, all summer.....	10	50	10
POTENTILLA GLANDULOSA. Of the many species we have tried, we give this a forward rank for all-around usefulness. It is one foot tall, has rather large bright yellow flowers, freely produced for several weeks. The foliage is thrifty looking, pinnate, the plant is not particular as to exposure or soil and withstands drought to a remarkable degree.....	10	50	5
PRIMULA PARRYI. Alpine species, one foot, large crimson flowers, moist soil	30	3 00	
RANUNCULUS NUTTALLII. Small fern-leaved sort, yellow flowers.....	10	75	

	PLANTS. Each.	Dozen.	Seed Pkt.
RUDBECKIA LACINIATA. The original single form of the famous "Golden Glow." (We sell the Golden Glow at the same price)	10	75	5
SALVIA AZUREA GRANDIFLORA. This is a perfectly hardy blue flowering sage, blooming late when flowers are scarce.....	10	75	10
SAXIFRAGA NIVALIS. Snowy-white fragrant flowers in early spring, evergreen foliage, good sort.....	10	75	10
SENECIO DOUGLASII. Beautiful aster-like yellow flowers in autumn, sandy soil	10	75	10
SIDALCEA CANDIDA. Indian Mallow, White flowers.....	10	50	5
SIDALCEA OREGANA. Rose purple flowers, all summer.....	15	1 50	10
SMILAX HERBACEA. Rapid climber, handsome foliage.....	15	1 00	
SOLIDAGO MISSOURIENSIS. Dwarf, early sort.....	10	50	5
SOLIDAGO RIGIDA. Strong grower, distinct.....	10	50	5
SOLIDAGO RIGIDISULA. Small species, rare.....	10	75	10
SOLIDAGO SPECTABILIS. An exceedingly beautiful sort, with large panicles of very fragrant flowers. Does not produce suckers and therefore does not spread, but forms dense individual clumps which are as dainty as they are magnificent.....	10	75	10

	PLANTS. Each.	Seed Dozen.	Seed Pkt.
THALICTRUM CORNUTI. Large showy sort, white flowers.....	10	75	
THALICTRUM FENDLERI. Graceful, purplish flowers.....	10	75	
TRADESCANTIA BREVICAULE. Rare sort from Illinois.....	15	1 50	
TRADESCANTIA OCCIDENTALE. Free blooming, rather dwarf.....	10	75	
YUCCA ANGUSTIFOLIA. (See cut.) We believe this to be quite as hardy as the well known filamentosa. We have supplied it in considerable quan- tities and have had no unfavorable reports thus far. The foliage is very stiff, and conspicuously edged with white. Strong well rooted stock...	15	1 50	10

Plants Especially Suited to Dry, Rocky, or Exposed Situations.

This list can be added to if desired. We shall be glad to recommend plants for special purposes, if conditions are stated.

Amelanchier alnifolia.	Berberis repens.	Cerocarpus parvifolius.
Rhus trilobata.	Rosa Arkansana.	Artemisia, all species.
Bigelovia, both sorts.	Malvastrum coccineum.	Potentilla glandulosa.
Solidago spectabilis.	Yucca angustifolia.	All of the Hardy Cacti.

WE TAKE SUBSCRIPTIONS FOR THE FOLLOWING:

**MEEHANS'
MONTHLY**

Issued monthly, terms \$2.00 per year. Foreign subscriptions, 9s 6d. Meehans' Monthly contains concise, interesting and instructive articles on every branch of horticulture, the improvement of the home grounds, etc. Each issue contains a magnificent colored plate of one of our native flowers or ferns which alone is well worth the subscription price.

GARDENING

A beautifully illustrated Horticultural Journal for gardeners of all classes. The photographic reproductions of the best examples of Floral and Landscape Art, are both charming and exceedingly instructive. Published semi-monthly. Price, \$2.00 per year. Foreign subscriptions, 8s. 6d.

**AMERICAN
GARDENING**

A weekly illustrated Journal of Horticulture, and Gardener's Chronicle. A practical up-to-date publication for practical people. Price, \$1.50 per year. Foreign subscriptions, 6s. 6d.

WE MAKE THE FOLLOWING CLUB OFFER:

One yearly subscription to each of the three periodicals mentioned above for \$5.00, or to foreign countries 21 s. 9 d.

All orders for subscriptions must be accompanied by cash. Please make foreign remittances by International Postal Money Order.
